Burburnett May Extend West.

The General Refining company's well north of block 821 west of the proven field is likely the opening of another extension running along the river bed but on the Texas side of the Red river.

It will mean nothing serious in the way of an over supply and oil operators are not likely to be cutting prices in order to sell their oil as from now on pipe line facilities will be available.

The new Sinclair eight-inch line together with the Empire line, the taking of oil from the big Weber lease will relieve the situation and Burburnett can breathe easy while an accurate estimate can be made of its production.

Reports from wells between the newest find and the old pool are to the effect that no oil will be found unless along the river and the only possible connection will be either in the river bed or along the south shore.

It will only be a day or two until the gulf pipe line is completed into the field and then there will be a genuine scramble for oil. The fellows with pipe lines galore across the river in Oklahoma will see that the price is kept up hereafter, because now when pipe line facilities are ample, they can be depended upon to get the price up to where it belongs.

No blame can be attached to a small gathering line when oil producers are willing to make contracts at \$1.50 per barrel and have been made and this to run a year. The situation has changed now and all go to the better.

At Ardmore.

ARDMORE, Okla., Nov. 19.—Anderson & Simpson well, in 27-42-2w, has been trying to drill past the bit, which was lost in the hole some time ago, but so far the attempt has been unsuccessful and at the last report the well was at a standstill. The depth of the well is something like 2,360 feet.

With Franklin well, on the Thompson farm in 21-42-2w, has been drilled 8 feet deeper into the sand. The top of a prolific oil sand was found in this well several days ago, at a depth of 2,150 feet, and the drill has penetrated it 23 feet. The depth of the well now is something like 1,833 feet. The production is good for about 500 barrels.

Humble-Simpson well, on the Simpson farm in 21-42-2w, has reached a depth of 1,950 feet and is drilling in a lime stone formation.

Chickasaw Refining company, on the P. H. Morrison farm in 26-42-2w, is still at a depth of 2,150 feet and is running the casing preparatory to bailing the water from the hole.

Gypsy Oil company in 21-42-2w, a direct south offset to the With Franklin well, on the Thompson farm, is rigging up and drilling operations will probably be started within a few days.

A report received from the field states that the well on the Wolcott farm, the north offset to the discovery well to the south, drilled by the Texas company, reached the production at 2,150 feet and the well to the east, drilled by Weather & Daube, reached the first sand at 1,834 feet.

May Be Drilled in Today.

The very important Minnehoma well in the northeast corner of the southeast of the northwest of section 36-22-4w is expected to be drilled in today and is easily the center of interest in the oil country. The only well as far south was drilled only to 2,020 feet, while this test is on top of the sand at 2,358 feet. At the Minnehoma office it is stated that all is ready for a complete test of the depth of the sand. It will mean plenty of drilling further south and perhaps an extension beyond Covington if this well makes good.

In The South End.

The Texahoma Oil company abandoned the No. 1 Van Patten in 15-1-2 at 2,200 feet. No showing of oil was found.

The Magnolia Petroleum company will make a deep test in its No. 5 Howe Patten farm in 30-1-2. There was said at 2,170-2,200 feet with a small showing of oil. They are changing from rotary to standard tools.

The Kay County (Ira) company will also make a deep test with its No. 1 MacFarlane in 2-2-2 with a small showing of oil. They have been shut down at 2,510.

In Louisiana.

The Boone Oil company has a 12,000,000-foot gusher in its Glaucous No. 1 in section 8-11-11 three miles south of production in the Bull Bayou field. The depth is said to be 2,637 feet.

At Hewitt.

The Wirt Franklin No. 1 Well in 21-42-2w is making 520 barrels from sand found at 1,854 to 1,874

Garber and Billings News.
On account of the interest being taken in the south extension at Garber and the north extension at Billings an extended report is here-with given:

Charles M. Griffie and associates No. 1 Seaman in the center of section 29-22-3w is clearing out at a total depth of 2,250 feet.

Empire Gas & Fuel Co. No. 1 McLean in the northwest corner of southwest of section 31-22-3w is running six-inch casing to 1,840 feet.

Oklahoma Producing & Refining corporation No. 1 Warburton in the southeast of section 2-22-3w is fishing for sand at 1,900 feet taking in for sand at 1,900 feet.

Sinclair Oil & Gas Co. No. 1 Burns in the northeast of southeast of section 20-22-3w is drilling at 1,120 feet.

Gypsy Oil company No. 1 Ocker in the northeast corner of northeast of section 20-22-4w is drilling at 2,080 feet.

Empire Gas & Fuel Co. No. 1 Koch in the northeast corner of northeast of section 25-22-4w is running 10-inch casing to 1,400 feet.

H. H. Champlin No. 1 Schott in the northwest of northwest of section 29-22-2w has casing trouble at 1,870 feet.

der-running with six-inch at a total depth of 2,355 feet on their corner township No. 1 in the center of the northwest of the northwest of section 14-21-4w.

The Summers Oil company is fishing for sand at a depth of 2,750 feet in their Phoenix No. 1 in the south-east of the northwest of the southwest of section 13-20-4w.

The National Union has a parted casing in its No. 1 Roller in the northeast corner of section 11-20-4w.

At Morris.

The Haywood Oil company No. 2 Counsel in the northwest corner of 20-13-13 is abandoned at 2,967 feet.

W. C. Newman has a 20-barrel well No. 2 E. D. Harris farm in the south-west corner of 35-13-14. The sand depth was 1,750 feet.

Thomas K. Smith of the firm of Chesnut and Smith is back from a business trip to New York and looks as though his vacation has been of great benefit. This is not saying, however, that he was in a failing condition when he left Tulsa as he is always in prime condition while breathing Oklahoma zephyrs.

David J. Johnston, who is interested in the North American Refining company, was in Tulsa yesterday and reports his company in good shape with plenty of their own crude shipped from the company's holdings in Burk Burnett.

J. H. Hadley, prominent in oil and political affairs, is back from a mission, having been called to Indianapolis where he attended the funeral of his father who would have shortly celebrated his 61st wedding anniversary.

Mr. and Mrs. Matt McCormick of Nowata, announce the marriage of their daughter, Edith Elmer on Tuesday, November 18th, to Mr. Frank Brooks Peterson and thus one of the most brilliant and beautiful girls in the entire oil country has been wedded and won and there will be sorrow galore among her many loyal admirers here. She is worthy of all the good fortune there is.

Dr. C. K. Francis, manager of refineries for the Transcontinental Oil company, is in the city and reports that the company's refinery with 5,000 barrel initial capacity is now in operation having started on Burk Burnett crude which is carried in tank cars pending the completion of the pipe line owned by them into the heart of the Ranger field. He says that the new refinery which was purchased from the inland before completion is performing fine and that only a few changes were thought necessary so well was the plant constructed.

WANTED TO BUY
50 to 100 barrels of GOOD settled production on a lease of 80 acres or more. We will also consider drilling on a 50-50 basis on satisfactory acreage in Osage or Beggs districts.

This Is to You
If you are one of the many men who have bought insurance and at your death allow the total amount to be paid in cash to your family without safeguards. A folder issued by one of the leading insurance companies says in part:

"The average estate lasts from seven to nine years following the death of the creator. NINETY per cent of estates over \$5,000 are dissipated within SEVEN years."

Think This Over
If you decide that a safeguard is necessary to protect YOUR ESTATE, our Trust Officers will be pleased to tell you how the SERVICE of the Exchange Trust Company will furnish this protection.

Ask for our latest Booklet, "THREE EPISODES." It will help clear your vision.
